May Rainfall Over Five Inches

During the first two weeks of May, over 2 inches of rain fell in Oyen, and during the last two weeks over 3 inches of rainfall was recorded. This was practically general through out the district.

Gauge readings since the mid- of May, are as follows:

Tuesday, May 17	.25 inch
Thursday, May 19	.21 inch
Friday, May 20	.26 inch
Saturday, May 21	.22 inch
Sunday, May 22	.25 inch
Monday, May 23	.21 inch
Wednesday May 25	.22 inch
Saturday, May 28	.44 inch
Sunday, May 29	.48 inch

Total 3.04 inches

Play Staged By Young People's Club Makes Great Hit

A large audience gathered in Oyen last Thursday to see the play "Aaron Slick from Dunn Creek", staged by the Young People's Club. The support given by those living in the country, many of whom drove miles over bad roads, was particularly gratifying to the members of the cast, but no one visitor remarked: "It was well worth it. The play was fine."

Everyone appeared to thoroughly enjoy the evening's entertainment, which left little to be desired. Those who saw the play on Easter Monday (the day of the blizzard) say that last Thursday's performance was even better than that of the first night. No doubt, with a larger audience to play to, it was easier for the cast to do justice to their parts.

The inclusion of Dr. McPhail in the cast in place of Clyde Ruddell, who left Oyen the day after the first performance, proved a happy inspiration, his work as "The Mysterious Clarence Green", was most successful. As in the first show, Miss Bontchie Holt as the saucy tomboy "Sis Riggs" caused gales of laughter. Her acting was unusually good, and her two dance numbers won a storm of applause. Andy Carr as "Aaron" proved great fun, and played his part very naturally. His lines and actions won lots of laughter, and his love making was just a scream (Aw, now you go on) Mrs. A. Johnson, as the charming Oklahoma widow, carried her part very well, and swung a wicked broom when she knocked "Aaron" into the dough. (Andy, sotto voice: "I'll say she did!") Miss Josephine Brezden, as "A Sweet Young City Gal" who liked and disliked alternately, country life, played her part with assurance, and made quite a splash when she operated the churn for the first time. Mr. Karl Venn as the city speculator or "Wilbur Merriwell" did justice to his part and adroitly recovered his mustache which was temporarily lost in a fracas with "Aaron" (wild shrieks from the audience). Miss Peggy Monaghan as "The Girl in Red" was very good, and her two vocal numbers in the last act won most hearty approbation.

A dance was given following the play.

Dr. Taylor, Dentist of Altnak, will be in Oyen, June 9-10-11, for practice of Dentistry.

BUY A FLAG

Canada's Big Jubilee Celebration is billed for July 1-3.

Oyen will celebrate right royally. It is the duty of each citizen to fly the Canadian Flag.

We cannot stock sufficient flags for the occasion but we are taking orders for June 1st shipment and we offer these at 10 per cent on cost. Call and see our price list and place your order and be sure of your flag.

All roads lead to Oyen July 1st

We have to-day installed a new Holwick electric coffee mill. Let us sell you coffee and get the desired fineness, and fresh ground.

Mr. Palmer, of the House of Hobberlin will be at our store for one day only, Saturday, June 4.

Make it a point to call and inspect his samples.

S. A. MILLER

Our Store will close at 1 p.m. each Wednesday during June, July and August.

REQUIRE A YEAR LONGER TO REACH PORT CHURCHILL

Ottawa.—Completion of the Hudson Bay Railway by May next is the goal set by the Government. It is estimated that it will take about a year longer to reach Port Churchill, the furthest point of the line. The work is progressing both as regards putting the existing line in shape for operation and also the new construction. The heavy haulage work is considered very satisfactory.

As between Churchill and Nelson, the minister expressed no preference, stating the decision will be based upon the best expert advice obtainable. Mr. Dunning will accompany the British engineer, Fredrick Palmer, to both places at the end of July, and a number of high officials will also be along. Meanwhile, preliminary data is being collected while the investigation is in progress on the straits is under way.

"There is no rivalry between the two potential terminals," Mr. Dunning said, "because there is no population to attract. At Nelson a factor and a few others are about the only white residents while at Churchill there is only a few Canadian Mounted Police. A large development, however, is foreseen when the road is finished.

Should the line go to Churchill, the road will not be completed until Nelson has defected at a point 65 miles from there.

Meanwhile, a big rush to the north country is reported by prospectors, farmers, hunters, trappers and all sorts of people attracted by the lure of the district. It has been necessary to put on a regular weekly service in place of the way-farers being accommodated on the construction trains.

Better Labor Conditions

Shipbuilding on Clyde Creates Demand For Men

London.—In a little over four months the number of unemployed workers in the Clyde district has dropped by one third. The improvement is mainly due to increased activity in shipbuilding and marine engineering. There has even been a shortage of labor for iron, steel, engine, and boiler work, and employers have shown readiness to accept apprentices, a condition that has not been apparent for years.

Future of the Dominion

Ottawa.—"Our grandchildren may even live to see the day of Empire transferred to our shores," declared Dr. J. H. O'Connor, of St. Thomas, Ont., president of the Royal Society of Canada, in discussing the Dominion's future at the society's forty-fifth annual meeting. "The future of our Dominion," he continued, "is in the whole light with promise."

Hon. R. Lemieux Honored

Montreal.—Reception and luncheon in honor of Hon. R. Lemieux, Minister of Finance, and his wife, at the Hotel de Ville, were given by the British and Canadian societies. Hon. Sir Roland Graham, was attended by several English and Canadian visitors in addition to a distinguished gathering of residents of the capital.

National Thanksgiving Day

Ottawa.—Sunday, Nov. 2, was the date set by the national committee for the celebration of the diamond jubilee of Confederation for a national thanksgiving day. It is reported that the people gather at prominent centres for services of thanksgiving for the blessings that have grown out of Confederation.

Chair of 11,000 Voices

Ottawa.—A choir of 11,000 voices including 1,000 voices selected from 20 churches, irrespective of race or creed, and 10,000 school children, will sing a program of religious hymns and anthems in connection with the jubilee celebration here. C. J. Rickwood, Ottawa, will direct the choir.

Would Send Boys to Canada

Life of Man Has Scheme for Community Settlement in Dominion

Montreal.—Canada is the country to which the life of Man is looking for the settlement of his youth, said J. B. Crookall, J.P., mayor of Douglas and member of the House of Representatives, Montreal on the Western Star line. Every year the life of Man has about 400 boys leaving school at the age of 14. A proposal is being made to send 12, following which the island authorities would give a course of training for one year to fit them for education. Mayor Crookall hoped that Manxmen in Canada would interest themselves in this project.

The mayor outlined a scheme he had for the community settlement of Manxmen in Canada. He proposed to send out 100 families if the Dominion Government would set aside a tract of land sufficient to provide for them, making the terms as easy as possible. About 50 per cent. of these families would be agricultural.

Prize for Pacific Flight

Hawkins Offers \$25,000 to First Aviator Making Canada to Honolulu

Honolulu.—The Star Bulletin, in a copyrighted article, announces that Hawaiian Prince, president of the Hawaiian Pineapple Company, has offered a purse of \$25,000 to the first aviator and \$10,000 to the second to make non-stop flight from Honolulu to Hawaii during the 12 months starting August 15.

The Bellanca monoplane "Colombia," in a Chicago plane Chamberlain had hoped to be the first to fly to France, will be entered in the \$25,000 contest. The plane, owned by James D. Dole in Honolulu. The pilot, named "America," which also has been beaten to the post in the Pacific by the British Empire, and may fly to the Hawaiian Islands, it was said.

The Favored Country

British Labor Leader Says Emigrants Opportunities in Canada Best in World

London.—Canadian Canada greater possibilities than any other country in the world provided the right kind of employment is available. In the opinion of C. P. Crampton, general manager of the National Union of Railwaymen, who has just returned from a tour of the Dominion. Mr. Crampton said that "the vast of Canadian organized labor against the domination of American unions," and the similar movement among professional associations. Canadian railways also came in for a glowing reference from Mr. Crampton.

New York Financier Dies

Payne Whitney, One of America's Richest Men, Victim of Heart Attack

Manhasset, N.Y.—Payne Whitney, financier, philanthropist, sportsman and one of the richest men in the country, died of a heart attack while playing tennis at his country estate, Greenvale.

Mr. Whitney was 52 years old. He was the brother of Harry Payne Whitney, son of the late William C. Whitney, secretary of Navy under Cleveland. Estimates of the Whitney estate ranged in Wall Street from \$100,000,000 to \$100,000,000. In 1921 he paid an income tax of more than \$2,000,000, only John D. Rockefeller, Jr. and Henry Ford paying more.

Postmaster's Convention

Pistons, Sask.—T. P. Murphy, Ottawa, superintendent of the equipment and supply branch of the federal post office department, will represent the postmaster-general at the forthcoming convention of the Saskatchewan Postmasters' association to be held in Regina, Tuesday, Wednesday and Thursday, June 7, 8 and 9. About 150 delegates are expected to be in attendance.

Cable Bill Passed

London.—The House of Lords has given third reading to the Pacific Cable Bill, which has now passed both Houses. The bill authorizes the reorganization of the Pacific Cable Board in accordance with the provisions of the Cable Act of 1914, which body reached at the last imperial conference.

Plane Service for Mines

Winnipeg.—An airplane passenger and freight service to the central Manitoba mine area was inaugurated on June 1. It marks the first commercial air service to operate in the province. Western Airways Ltd. operates the line. The first flight was made on June 1. The line is operated by the Western Airways Ltd. of Winnipeg.

Experiment Was a Failure

New Zealand Lost Heavily in Attempt to Control Price of Butter

Vancouver.—New Zealand's futile attempt to fix the price of butter on the London market, the boycott by London buyers of more than 50,000,000, or roughly, 50,000,000, keils, which were allowed in area, failed in its attempt to control the price of butter. In the short time, have been factors in the short age of butter supplies in Canada during the past few weeks.

The action of British merchants in buying butter from Argentina, Australia and India, while leaving New Zealand's price-controlled supply severely alone, withdrew from Canada heavy supplies that normally would have been available for home requirements. It is said here.

As a result, Canadian butter dealers have been scrambling for immediate requirements for months, placing up stay tactics here, there and everywhere, some having brought back butter from some of the United States, and a total of about seven million pounds shipped direct from New Zealand.

The lateness of the season in Canada has also been a factor in the butter here, spring production having about a month less than usual.

RUSSIAN TRADE AGREEMENT IS TO BE ABROGATED

Trade With U.S.

Ottawa.—The Government has decided to terminate immediately the trade agreement with Russia. It was announced following a lengthy meeting of the cabinet council.

President King, in making the announcement, declared this action had been decided upon after a full discussion of the situation created through the decision of the British Government to sever its relations with Soviet Russia. Evidence in the case of the Canadian Government, which the Russian Government, made certain sections of the agreement between Canada and Russia had been violated by the Russian Government. Premier King pointed out that the agreement was subject to termination on certain conditions, which were fulfilled. He specifically cited a provision agreed to refrain from hostile action or undertakings against the other and from conducting outside of its own borders any official propaganda directed against the interests of the British Empire or the Union of Soviet Republics respectively.

President King stated emphatically that termination of trade agreements would not mean discontinuation of trade between Canada and Russia. It would mean that certain special diplomatic privileges enjoyed by the Russian trade commission would be withdrawn, but every effort would be continued to further trade between Canada and Russia in the same manner in which Canadian trade relations with other nations were conducted.

The Premier said evidence in the case of the Canadian Government, which the Russian Government, made certain sections of the agreement between Canada and Russia had been violated by the Russian Government. Premier King pointed out that the agreement was subject to termination on certain conditions, which were fulfilled. He specifically cited a provision agreed to refrain from hostile action or undertakings against the other and from conducting outside of its own borders any official propaganda directed against the interests of the British Empire or the Union of Soviet Republics respectively.

Ox-Tongue Falls, Lake of Bays

At Huxley Inn, there are many historical materials of which Ox-Tongue Falls shown above is one—Canadian National Railway photograph.

WOULD DEVELOP CANADIAN TRADE WITH BRITAIN

London.—It was to be expected that the Canadian trade with Britain, on the continent and to acquire itself more fully with the possibility of the Canadian trade with Britain, (the products) Hon. James Malins, Canadian minister of trade and commerce, told newsmen in an interview. He added that he was particularly desirous of increasing trade with Britain, of which he had been a constant advocate.

The minister mentioned the grant of \$100,000 made by the Canadian Government for advertising Canadian products in Britain. To receive the best results of applying the money was an important object of his visit, he said. Mr. Malins acknowledged that the British of Canadian trade with Britain had shown a decrease, though the seasonal activity of Britain to purchase Canadian products, although showing a slight increase. He believed adequate publicity would soon help to correct the situation. There was always, he said, some uncertainty about statistics and they did not in any way show the true position of trade between two countries like Canada and Britain.

Trade With U.S.

Canada, Regarded by U.S. as Best Outside Field for Investment

Detroit, Mich.—Business of the United States made an eloquent gesture of admiration for its neighbor to the north when the National Foreign Trade Convention turned over an entire session to Canada and Canadians. Speakers with only one exception were Canadians. They spoke of their great commerce in hard wheat and poultry, of their other export trade and of the growing interest of Americans in Canada as attested by their investment of \$2,500,000,000 within the Dominion. Sixty per cent. of all foreign investments in Canada came from the United States. The convention was held by Chase R. Harlow of the Canadian Bank of Commerce, New York.

"Take it as a compliment," he added, "that Canada is regarded in the United States as the best outside field for investment, and we interpret it as an indication of the estimate placed by the United States upon the character and ability of Canadians."

Agree on Claims

Washington.—The British and United States governments have agreed to a settlement of mutual claims and those of individuals against both governments for seizure of warship shipping, but terms of the settlement are being withheld, pending an arrangement for publication of final notes ratifying the pact. The claims arose out of detention and search during the war on ship ping of both countries suspected of carrying war supplies to the enemy.

Will Compete in Prize Swim

Montreal.—Ernest Winkler, Germany's fastest swimmer and conqueror of the English Channel, has arrived in Montreal. He will participate in the Lake George swim for a prize of \$10,000 and later go to Toronto, where he will take part in the \$50,000 race to be held in Lake Ontario on the Queen City during the summer.

Investigating Plan to Use Sulphite Wastage

Scientists See Possibility of Making Paper from Waste of Paper Mills

Ottawa.—Canadian scientists are investigating the possibility of the manufacture of a substitute for paper from the waste of the paper mills. Sulphite waste, which is a by-product of the sulphite mills throughout the Dominion, it was revealed at a meeting of the scientific committee of the National Research Council of Canada here.

The sulphite waste, it was declared, is a potential source of pulp for newsprint and for the manufacture of paper. It is a potential source of pulp for newsprint and for the manufacture of paper. It is a potential source of pulp for newsprint and for the manufacture of paper.

The committee also recommended that the national research council investigate steps to secure the sulphite waste from the mills. It may be used as a check upon certain sections intended to oppose the Government's moves and decisions.

Building New Telegraph Line

Work Will Commence at Once in Northern Saskatchewan District

North Battleford.—Construction is to proceed on a telegraph line between London Lake and Meadow Lake. The line is 55 to 60 miles. The line will serve to link up the Meadow Lake country with the abundant fur sections farther west. It will be a source of communication for those sections, which have not at present. On representation being made to the department by the Federal Government, an appropriation of \$900 was put through Parliament for the building of the line. The government is ready to start at once on the building of the line. The office to be established on the line will be set just as soon as possible.

Great Interest Being Taken in Eclipse

English Railways Will Run Special Trains to Vantage Points

London.—The eclipse of the sun which will be observed by a portion of the British Empire on June 15, is arousing such interest that railway and motor bus companies are preparing to carry thousands of excursionists to the vantage points. The eclipse of the sun which will be observed by a portion of the British Empire on June 15, is arousing such interest that railway and motor bus companies are preparing to carry thousands of excursionists to the vantage points. The eclipse of the sun which will be observed by a portion of the British Empire on June 15, is arousing such interest that railway and motor bus companies are preparing to carry thousands of excursionists to the vantage points.

Want Canada to Attend Air Meeting

Invitation to Attend Inter-American Conference on Aeronautics

Washington.—Canada will be invited to join other countries on the American continent in an international conference on aeronautics. The recommendation of Argentina carries the Pan-American congress this year. The conference will be held in Buenos Aires. The recommendation of Argentina carries the Pan-American congress this year. The conference will be held in Buenos Aires. The recommendation of Argentina carries the Pan-American congress this year. The conference will be held in Buenos Aires.

WILL OBSERVE LUNAR ECLIPSE IN FAR NORTH

New York, N.Y.—The outposts of civilization in the Canadian Arctic wilderness have been asked by radio to aid the Harvard University observatory in observing on June 15 the first lunar eclipse since 1892. Observers in the northern country in the region of Chesterfield Inlet, Bear Lake, Repulse, Baffin and Gjoa Hope had a message of instruction broadcast to them recently.

Directions for the observation of this rare lunar phenomenon, addressed to members of the Royal Canadian Mounted Police, representatives of the Hudson's Bay Company and Revillon Freres Trading Company and the Eskimo missionary fathers among the Eskimos, was broadcast in part as follows:

"A total eclipse of the moon will occur on June 15, 1927, the centre of the eclipse being at 22.4 and Eastern standard Time. The sun and moon will both be nearly on the horizon on the day and hour mentioned. The best time for this message is addressed."

"It is of great scientific interest to know as exactly as possible what the weather conditions are at that particular time at points near this line. Baker Lake is the most important point of all and the personnel would appreciate any special efforts to procure observations there."

According to Dr. William J. Fisher, of the Harvard University, it should be possible this year to determine the density of the earth's shadow very near to the edge of the earth.

ACTIVITIES OF SOVIET AGENTS COME TO LIGHT

London.—It was stated in official circles that the names of hundreds of persons in Great Britain, including a number of members of Parliament, as well as persons more or less known in North America and other parts of the world, in addition to those published in the white papers, have come to the hands of the Government through its investigation of alleged Soviet activities.

So far as is known, the names of the members of the Parliament will not be made public, as it is understood the Government has no intention of taking what enemies would consider advantage of their special information. Further, it is understood the Government has no intention of taking what enemies would consider advantage of their special information.

In parliamentary lobby circles, however, it is thought likely the names may be made known to the leaders, which fact may have more or less bearing on the situation generally. In London, it is understood the Government has no intention of taking what enemies would consider advantage of their special information.

A Government spokesman avoided several Australian shipping strikes in the last two years solely in support of the Government, which was to spread propaganda, stir up trouble and further Moscow's aims.

The British Government made use of its promise to publish some of the 16 documents alleged to have been uncovered in the recent sensational raid on Soviet House, in London, in the quarters of the Soviet trade delegation, and Arcos, Limited, the Russian commercial organization, in London.

It listed a white paper containing the documents to illustrate, as it is said, the "various possible activities of the Soviet Government and the third international against Great Britain."

The most interesting part of the contents from an internationalist point of view is a British standpoint was that the commercial organization of the Soviet Government, in London, in the quarters of the Soviet trade delegation, and Arcos, Limited, the Russian commercial organization, in London.

United and Intelligent Action Will Be Needed To Stem Westward Migration of Rat

The press reports recently that a number of rats had been killed by farmers in Saskatchewan, sharply draws attention to a very interesting fact from an agricultural point of view, namely, that the Canadian west is one of the few agricultural areas in the world that is not overrun by these pests and secondly that no time should be lost for every farmer in the prairie provinces to take up this challenge by immediate and no uncertain precautionary action. The truth may as well be faced, says the Natural Resources lately given Service of the Department of the Interior, namely, that the brown rat, native to China and Europe and all Europe, is seeking to add to the more provinces of Canada to its habitat. Ever and anon he continues his westward march and it will, no gainsay the most united and intelligent warfare to stem his migration.

There are two aspects to the threatened rat plague. First, he is a great carrier of disease, particularly of the bubonic plague or "Black Death" and history tells us that in the fourteenth century some twenty-five million people died in Europe of this dread disease. Nor will it be forgotten that in 1894 there was an epidemic of the plague in India and 2,000,000 deaths are stated to have occurred. Second, there is the economic aspect. What a loss to the farmer! Rat Enquiries were carried out in Europe in 1907 and the average annual loss caused by each rat in Great Britain was placed at \$1.38, in France \$1, and in Denmark, \$1.20. Like everything else there is little doubt that the high cost of rats has since gone up.

The genus Mus includes some 120 species of rats and mice but it is the common brown rat which has staged one of the greatest of all animal migrations, animal or human. His native country appears to have been Western China and he has been fought in scores of countries, but he moves onward conquering new territory. And it is little wonder that he has won in our country, where, once considered his prolific habits of breeding, brown rats begin to breed at three or four months of age, they have from six to ten litter, per year averaging ten each. A pair of rats breeding uninterruptedly for three years without any deaths to their progeny would result in that time in a colony of over 250 million rats.

Mice are had enough, but the brown rat is infinitely worse and can conquer the toll he will take if he becomes firmly established in the greatest granary of the British Empire. A few years ago it was thought that the long-haired winners of western Canada would prove a deterrent to colonization of that country by rats but they gradually migrated from the coast and into the interior southern Manitoba. Now they have reached the Qu'Appelle district of Saskatchewan, and they are known to have burrowed under a straw stack and found sufficient shelter for the winter.

The brown rat is omnivorous in its diet and eats anything edible, vegetable or animal, even leather and fabrics. It attacks poultry, destroying eggs and chickens; eats fish and fruit are equally acceptable with all kinds of meat, groceries and vegetables; it will eat its own weaker brothers and sisters if treated for food and has not infrequently attacked helpless baby men-babies. It visits sewers and other filthy places carrying and scattering the germs of disease.

The gopher is pest enough without this insidious habits and vicious carrying propensities runs as far more dangerous. The whole of Canada should rise up and wipe out these pests and evidence is being gathered that the war is on in earnest in some municipalities, where bounties on rat tails have been announced. Individuals should not wait for a bounty, however, but should declare war on the first invasion of their territory and with widespread recognition of the danger and concerted action it ought to be possible for a young and vigorous country in settlement is not too dense to win out, though older and more thickly populated countries, hampered by ancient sanitary systems and less modern living conditions have failed.

For ten years after its construction in 1856, locomotives were not allowed to enter the passenger station in London for fear of frightening horses. The coaches were dragged into the station by a stationary engine.

Legume Bacteria Why Legume Inoculation Sometimes Fails to Benefit Crops

Under ordinary field conditions, the presence of the proper strain of legume bacteria in the soil is necessary for the successful growing of alfalfa and other legumes. It is therefore always essential to inoculate when there is any reason to suspect a scarcity in the soil of the bacteria associated with the particular legume to be grown. There are times, however, when inoculation fails to benefit a crop. Such failure may be assigned to a number of different causes which are enumerated in a new experimental paper published, which may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

In a large number of cases the reason is that the soil has already been inoculated, and the additional bacteria consequently are superfluous. In other instances, where the crop growth is as poor with treated as with untreated seed, adverse climatic and soil conditions may be responsible. The proper treatment of the soil is very important and is fully described in the pamphlet, "Good drainage and liming are frequently necessary before a good legume stand can be established as they favor the crop, not only directly, but also indirectly by fostering the nitrogen-gathering bacteria. Inferior seed is a very frequent cause of failure. The use of hardy Canadian-grown seed is essential. In short it should always be remembered that legume bacteria are living things and to do their work properly must be in a suitable environment.

Was Somewhat Delayed
A postcard from a friend of boyhood days recently was received by Charles Swift, Lexington, Mass. The sender was inquiring if Swift knew the whereabouts of other schoolboys. Surprised, Swift turned to the postmark, discovered that the card had been mailed March 21, 1923. It had been in the mails 44 years.

"John! What do you mean by getting this at this hour? I thought I was a husband—'all right, m'love, I just hurried home 'cause I thought you might be home, but I see you're still asleep' staying with you."

A movement is under way in Japan for the passing of a law permitting women to be admitted to the bar.

Every man who holds the decision that sooner or later he will invent something that will make him rich.

He (after being accepted)—"And do you like travelling on Pullman?"

His companion (shrugging)—"Yes, with the proper reservations."

The Buffalo News wants to know why so many Canadians are returning—over the U.S.A. to Canada. They've had a close up of both and know now which is best.

Current Activities Indicate That Manitoba Will Soon Become Steady Producer of Gold

Cattle Imports From Scotland Permitted

Department of Agriculture Raises
Embargo Under Certain
Conditions

The situation in regard to foot and mouth disease in England has so greatly improved that the British Ministry has found it possible to remove its restrictions on the importation of cattle in that country. In view of this, and as Scotland has been absolutely free from the disease for six months, the Department of Agriculture at Ottawa now considers that it will be justified in permitting the importation of cattle, sheep, other ruminants and swine from Scotland under certain conditions.

An order has just been signed, says a statement issued by the department, permitting such importations from Scotland, provided that such animals must be embarked from a Scottish port and, in addition to the usual health certificate, must be accompanied by a bill of sale of the shipper that the animals on embargo have been in Scotland for a period of six days immediately preceding the date of embarkation. The animals must also be shipped on a vessel proceeding direct from Scotland to Canada, without touching at an English port, and they must be accompanied by an affidavit from the shipper to the effect that the feed taken on board for feeding these animals on route has been grown and stored in Scotland.

Each importation will be made under permit, issued by the veterinary director-general.

Necessity of Fresh Ground for Chickens

Yearly Changing is Now Recognized
by Poultry Raisers

Poultry production in Canada has been in the past almost entirely a general affair, the district which has heretofore been largely supplied by its limited situation.

In northwestern Manitoba, a 20-acre experimental plant has been built north of The Pas, for the purpose of trying out a method of growing chickens on the long-range copper-zinc area found there. Some 16,000,000 tons of ore carrying an average of 1.6 per cent copper, 2.9 per cent zinc, 0.074 per ton gold, and 1.04 per ton silver have been located in the district, and as soon as a commercially feasible method of treatment has been developed in the pilot plant, the exploitation of the deposit will be undertaken on a large scale. It is estimated that the initial expenditure necessary to put the plant on a commercially productive footing, including the building of some 50 miles of railway, will be in the neighborhood of \$12,000,000. Hydroelectric deposits very similar in composition have been discovered throughout the district. The owners are only awaiting the outcome of the present experiment to undertake intensive development work on these sites.

Each importation will be made under permit, issued by the veterinary director-general.

Regaining Place In World Wheat Market

Great Increase Shown in Russia's
Production and Export

While five or ten years Russia will be again a major factor in the world wheat market, if the rate of increase in production and export from the U.S.S.R. is maintained. Before the war, Russia was the second largest exporter of wheat. During the past dozen years, of course, comparatively little has been coming out of the country, but recovery has proceeded so far that this spring exports have run as high as 750,000 bushels a week. As Russia has an even larger area of undeveloped wheat land than Canada, production can and will be still further increased; and as labor and land are cheap, the grain can be cheaply produced. "We are inclined to find some method of reducing production costs," remarks Mr. West (Winnipeg).

When Inoculation is Bill
"Let me see some of your black dirt gloves," said a lady to shopkeeper. "These are not latest style, are they?" she asked, when they were produced.

"Yes, madam," replied the shopman; "we've had them in stock only two days."

"I don't think they are, because fashion paper says, black kids have tan attachés, and vice versa."

The shopman explaining that vice versa was French for seven buttons, so she bought three pairs.

Canadian Maples for Canberra

Hon. Ernest Lapointe, Canadian Minister of Justice, now away in Australia, is leaving a lasting record of his visit and of Canada when on July 1st, he will plant at the new Australian capital, Canberra, a maple tree as one of the gifts of the Canadian people to the Australian people. The maple tree is a native of Canada and is one of the symbols of the Canadian people. The maple tree is a native of Canada and is one of the symbols of the Canadian people.

Federal Highway Grants

Last Fiscal Year in Which Federal Assistance Will Be Given

An amount in the neighborhood of \$65,000 payable to the Government of Saskatchewan, has been authorized by order-in-council in connection with Dominion Government contributions to highway improvements.

This is the last fiscal year in which the extended program of federal assistance will continue. The grants will expire at the end of next March and having been extended for five years more than was originally contemplated, the system is not likely to be continued.

It is impossible that in view of this fact, the position of construction of highways, created by the recent death of Archibald W. Campbell will be filled.

When a bride has been married about three months she begins to write home to the old ladies that she thought she would never have occasion to visit again.

We are usually wrong, but we know that we are right when we say that if you want a thing well done, don't do it yourself unless you know how.

About Town and Country

Friday, June 3, the King's birthday is a Dominion Holiday.

The Post Office will be moved from its present location to the ground floor of the Masonic Building, to-day, (June 1).

Advance posters are out for the great Diamond Jubilee Celebration in Oyen on July 1. Watch for large posters.

Mr. Alan Hopkins was discharged from hospital last Wednesday and is convalescent at the home of Mr. and Mrs. G. S. Peck.

Mr. F. L. Aylesworth has purchased a new Chevrolet coupe.

George Cooper, who was the victim of a run-away accident during the first week of May, since when he has been cared for at the home of Mr. and Mrs. Joe Colston, has recovered sufficiently to return to his home.

Mrs. R. E. Gillespie returned to town last Sunday, after attending the annual convention of Alberta Women's Institutes, held in Edmonton.

Mr. William Hogan was admitted to hospital yesterday suffering from sinus trouble.

The laughable comedy "Nothing But The Truth", will be presented in Oyen, on Saturday night, June 4, by St. George's Dramatic Society of Hanna. Show commences at 8.30 p.m. Admission 75 cents. The play has been given with great success at Hanna, Youngs town, Sunnyside and other places.

Mrs. W. H. Sharp who has been on the staff at Desso's barber shop for the past five weeks, was called to Saskatoon on account of her husband receiving injuries in an accident. Mrs. Sharp was accompanied to the city by her daughter Miss Gertrude Sharp.

Dr. Swartzlander was a Calgary visitor last Thursday.

Miss Harriet Peterson was the weekend guest of Miss Thelma Dial.

Oyen Agricultural Fair, July 27-28.

Mr. W. G. Meisenhelter, who was admitted to hospital some time ago is making satisfactory progress.

A ball game last night between married men and girls, and a boys team resulted in a win for the latter 2-3.

BRILLIANT CANADIAN AUTHORS
A new and authorized photograph of Miss Maza de la Roche, who recently won a \$10,000 prize offered by a well known American magazine for the best novel of the year—Photo by Mr. Lynde of Toronto.

Wednesday half-holiday will be observed by the business men of Oyen, during months of June, July and August. Shops will close at 1 o'clock sharp.

Don't forget the monster Diamond Jubilee Celebration in Oyen, on July 1. All roads lead to Oyen that day.

Mr. John Black was admitted to hospital on Monday, with a broken ankle. While out riding, his horse fell heavily and his leg was pinned beneath the animal.

Oyen Summer Fair

The annual summer fair of the Oyen Agricultural Society, will be held on Wednesday and Thursday, July 27-28. Preparations are now being made to make this event an outstanding one in the history of the society.

Membership this year includes a free pass to the grounds, and it is hoped that residents of the district will support the society 100 per cent.

Prize list will be available about the middle of June.

"Nothing But The Truth", the hilarious comedy which will be presented by St. George's Dramatic Society of Hanna, in Oyen Theatre next Saturday, comes extremely well recommended. Don't miss it.

Look at your address label!

CANADIAN NATIONAL EUROPEAN TOURS

A maximum of travelling through particularly interesting countries at a minimum of expense is provided in the Canadian National Educational Tours this summer through Scotland, England, France, Belgium, Switzerland and Italy.

Two tours have been arranged and sailing will be made from Montreal, July 8, on the S.S. "Audain", direct to Glasgow. Very careful attention has been given to itineraries involved.

Tour No. 1 is a 37-day trip on sea and land, visiting important cities in Scotland, England, France, Belgium, Switzerland, All expenses, \$372.50. Montreal to Great Britain and the Continent and return to Montreal.

Tour No. 2 is a 51-day trip on sea and land, visiting in Scotland, England, France, Belgium, Switzerland and Italy. All expenses, \$501.00. Montreal to Great Britain and the Continent and return to Montreal.

There will be low excursion fares to the seaboard from points in the Prairie Provinces. These tours will be personally conducted from Western Canada, and while overseas will be under the direct care and supervision of the thoroughly responsible and reliable organization, fully qualified in every particular to successfully look after the interests of our patrons.

The sight-seeing program is very complete and generous. Motor coaches and auto buses are freely used. All sight-seeing is well planned to save unnecessary fatigue and to see the worth-while places within the time at our disposal. Competent lecturers will reveal to our patrons the outstanding features, literary, historic, artistic or scenic of the Old World centres visited.

Mr. M. G. Whitlock, local agent for the Canadian National Railways, will be glad to discuss these tours and arrange all details.

Canadian National Sixth Annual Tour To The Pacific Coast

In pursuance of a time-honored practice of affording its patrons every facility and convenience tending toward more vacation enjoyment, the Canadian National in operating its sixth annual tour confidently believes this will again prove to be the greatest, aid and convenience to a host of teachers, as well as to professional men and business men and women, vacation bent.

The tour will commence at Winnipeg, from which point a special train of modern sleeping car equipment, dining car and radio observation car, will leave July 4th. The party will be personally conducted by an efficient and experienced representative of the Canadian National.

After stopping at various points of interest, the train will arrive at Prince Rupert July 9th. At this latter point the party will embark on a palatial steamship for a cruise of 540 miles through the famous "Inside Passage" to Vancouver. While the tour terminates at Vancouver, those who desire to make a trip to "Victoria" may have their tickets read "Victoria" at their destination without any additional cost.

This mode of travel has many advantages. In the first place, it is planned with a view to including in the itinerary the most interesting points, which with the other arrangements that are made, obviate the necessity of the passenger worrying about connections, sleeping car accommodations, meals, and entertainment on route. This is all done in advance by experts, leaving the passenger free to enjoy to the full the scenery and attractions attending en route.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour.

Lot	Block	Plan
7	1	4409 A.R.
12	1	4409 A.R.
13	1	4409 A.R.
11	2	4409 A.R.
8	3	4409 A.R.
9	3	4409 A.R.
2	8	6889 A.W.
3	8	6889 A.W.
10	8	6889 A.W.
2	9	6889 A.W.
14	10	1212 H.R.
15	10	1212 H.R.
1	11	3731 C.D.
4	11	3731 C.D.
5	11	3731 C.D.
1	12	3731 C.D.
1	17	7038 C.C.

The above lands will be offered subject to a reserve bid and the reserves contained in the existing certificates of title. Terms cash.

Redemption may be effected by payment of full amount of arrears and costs at any time prior to the sale.

Dated at Oyen, Alberta, this 1st day of April, 1927.

F. C. BLISS,
Secretary-Treasurer, Village of Oyen.

Not a Judge

"You say the prisoner had been drinking," said his worship to the policeman who was giving evidence. "Drinking what?" "Whisky, I think," replied the constable. "You think," murmured his worship. "But, you know the smell of whiskey? Aren't you a judge?" Came the reply: "No! I'm only a policeman."

The nightgown is no more interesting than the midnight cat to the man who wants to sleep.

Many a man who thinks that he thinks has a wife who does all his thinking.

Frugality is a wig often used to cover a bald character.
